

KARRIEREWEG®
OVERSEAS EDUCATION & PLACEMENT PATHWAY

**DO
YOU?
KNOW**

“One in every five cars worldwide carries a German brand”

Germany is internationally renowned for its automotive industry and engineering excellence on the basis of innovation, dependability, safety and design. The automotive industry is the largest industry in Germany and the European leader in its industry segment. German automotive industry's proven record of accomplishment and commitment to new mobility technologies make it the world's largest auto innovation hub.

KARRIEREWEG works for the most experienced partners in the automotive industry in Germany, who takes care of the placement with the German workshops and the integration management of the candidate in Germany.

The German language proficiency level required for skilled workers to leave the country is an A2 certificate and/or a B1 certificate. The candidate also may have to attend and complete further in-service language courses in Germany.

“Motor Vehicle Mechatronics Technician”

The term (Occupation) implies to any candidate who fulfills the legal, technical and language requirements for working in a motor vehicle workshop (car / four wheeler workshop) and is able and willing to take up employment in a corresponding company in Germany.

“Commercial Vehicle Mechatronics Technician”

The term (occupation) implies to any candidate who fulfills the legal, technical and language requirements for working in a vehicle workshop specializing in commercial vehicles (heavy truck workshops) and who is able and willing to take up employment in a corresponding company in Germany.

Minimum personal requirements

The ideal candidate must:

- not be older than 41 years of age at the time of enrollment
- be willing and able to learn German up to level B1 in their home country (India)
- be willing to migrate to Germany permanently, integrate in to German society and live and work in Germany on a long term basis.
- remain with the employer permanently (at least 24 months)
- be physically fit and able to carry out the occupation and work in a German workshop
- not have any criminal record that prevent him from working in Germany

Admission requirements for enrollment:

In addition to the specified personal attributes which are mandatory, the candidate must possess the following pre-requisites to get enrolled into the program.

1. Updated CV in tabulated format
2. Valid passport
3. 10th / 12th board mark sheets
4. Diploma mark sheets / transcript

Note: Proof of completed training as a commercial vehicle mechatronics technician that is equivalent by German educational standards is a mandatory document. Only degree/diploma from state accredited institutions in the automotive and/or commercial vehicle sector are valid.

5. 03 years' of proven hands-on professional experience directly in the workshop as a frontline 'service technician' on passenger vehicles (car/four wheeler) or commercial vehicles (heavy trucks) in following domains.
 - *Mainly as a maintenance or service technician*
 - *Primarily as a repair or system technician*
 - *Proficient as a diagnostic technician*
6. Valid Driving License (Cars-LMV / Heavy commercial vehicles)

Expected technical/professional skills from the candidates:

The candidate must be familiar with the following tasks, has performed them in a workshop and can perform them independently.

- Conversion /upgrading / retrofitting of vehicles.
- Testing of vehicles' technical system.
- Compliance with the service plan.
- Final check of the function of vehicles' systems.
- Wheel and tyre change including balancing.
- Maintenance and inspection tasks according to manufacturer specifications (oil change, brake renewal, etc.).
- Maintenance work and repairs to mechanical components (engine, gear box, chassis, etc.).
- Wheel alignment and adjustment as per vehicle specifications.
- Reading and interpreting circuit diagrams.
- Handling measuring devices (multimeter, oscilloscopes, etc.).
- Maintenance work and repairs of electrical components of vehicles (telematics).
- Assembly and de-assembly of body parts.
- Repairing of body parts.
- Glass and window repairs.
- Parts identification and procurement.
- Testing of drive units, engine management systems and exhaust systems.
- Testing of manual, axle and all-wheel drive transmission and auxiliary drives.
- Functional analysis of air-conditioning systems or networked vehicle systems.
- Testing and data communication between control units.
- Inspection of components and assemblies –replacement of filters, spark plugs, replacement of high voltage components.
- Checking fill levels and changing engine and transmission oils and hydraulic fluids.
- Measuring and adjusting running gear.
- Repairs of drive units, exhaust systems, power transmission systems such as manual or automatic gear boxes.
- Repair of body systems such as locking systems, sunroofs, suspensions, damping and levelling systems.
- Repair of electrical and optoelectronic data communication lines.
- Carrying out test drives.
- Carrying out the final test of all functions, instructing customers in the use of retrofitted components or devices if necessary, handing over the vehicle to the customers.
